

Cementing veneers.
So easy. So aesthetic.

Vitique
Permanent cements

Vitique – cementing veneers. So easy. So aesthetic.

Thin layers? **No problem.**

Thanks to its patented monomer formula, Vitique offers the ideal consistency. This cementation system is your premium partner for integrating silicate ceramic and composite veneers with thin layer thicknesses. The broad range of shades provides you with the full scope of aesthetic options. Precisely coordinated Try-in Pastes reliably demonstrate how the teeth will appear later. It's as simple as that.

Discover the new possibilities for you and your patients. **With DMG's Vitique.**

Veneer cementation with added value.

Two kits, one system

The Vitique product system is comprised of two kits: The Cementation Kit contains cements and Try-in Pastes.

The complementary Vitique Accessory Kit contains etching gel, silane and bond.

Everything is of premium quality and carefully coordinated. Both the cements and the Try-in Pastes are also available as single refills.

Flexible shade selection

Vitique delivers the full range of shades, enabling you to offer each of your patients the ideal aesthetic solution.

The Veneer Cementation Kit comprises a standard range of three shades: B1, A2.5 and Transparent.

Refills enable the range to be expanded by up to five additional shades:

A1, A4, Bleach Light, Pink and White.

Precise preview

Know the results in advance: Vitique offers Try-in Pastes to match each individual shade. Special attention was paid to the shade coordination of these pastes.

The result:

Precise coordination of the shades in the Vitique Try-in and cement range permits a reliable preview of the end result.

Advantages for easy handling.

Good appearance made easy

The Vitique product system excels with its well-conceived details, which in turn ensure the most convenient use imaginable.

Practical Veneer Tip

To facilitate the cementing of veneers, a special Veneer Tip has been developed.

It enables convenient, rapid and even application of a flat strip of material.

Remove excess material with ease

The monomer formula patented by DMG prevents run-off and messy residues on ceramic restorations.

Thanks to its perfectly adjusted gel phase, excess material can be easily removed in one piece.

Easy, clean, quick.

Perfect adhesion due to a suitable bond

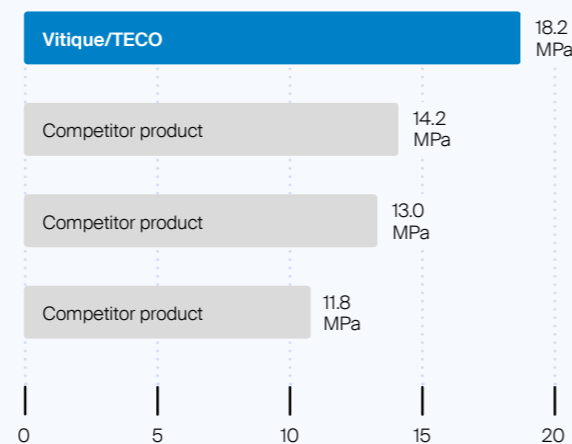

The bond included in the Accessory Kit is the DMG branded product TECO. This user-friendly bonding system is ideally adjusted for Vitique and its excellent bonding properties are impressive.

Additional security is achieved with the total-etch technique. This enables work to be carried out on moist surfaces after etching, hence preventing excessive drying of the dentine.

Left: Applying the material with Veneer Tip
Right: Hardened excess material, easy to remove.

Product overview

Vitique

Cementation System: REF 213080

- 3 Syringes @ 6 g Esthetic Resin Cement
Shade A2.5, B1, Transparent
- 3 Syringes @ 3.9 g Try-in Paste
Shade A2.5, B1, Transparent
- 1 Syringe @ 2 ml Etching Gel
- 1 Bottle @ 5 ml TECO
- 1 Bottle @ 3 ml Vitique Silane Adhesive
- 1 Bottle @ 3 ml Vitique Silane Activator

Cementation Kit: REF 213081

- 3 Syringes @ 6 g Esthetic Resin Cement
Shade A2.5, B1, Transparent
- 3 Syringes @ 3.9 g Try-in Paste
Shade A2.5, B1, Transparent
- 50 Veneer Tips

Accessory Kit: REF 213082

- 1 Syringe @ 2 ml Etching Gel
- 1 Bottle @ 5 ml TECO
- 1 Bottle @ 3 ml Vitique Silane Adhesive
- 1 Bottle @ 3 ml Vitique Silane Activator
- Accessories

Vitique

Refill:

1 Syringe @ 6 g Esthetic Resin Cement	
10 Veneer Tips	
Shade A1	REF 213038
Shade A2.5	REF 213039
